

KICKSTARTER Projects: Is This Project Going to Reach its Crowdfunding Goal?

Lior Solomon, Eva Marciano, Omer Sarig and Yotam Aharony

TAU

Reminder

Project Problem Formulation

Determine whether a new Kickstarter project is going to raise his crowdfunding goal by **Machine Learning Model** based on dataset of about 250k past projects

What is KICKSTARTER?

Kickstarter is an American public-benefit corporation, that maintains a [global crowdfunding platform](#) focused on creativity and merchandising.

Changed our Dataset

We moved from our “comfortable” [Kaggle](#) Dataset (no NaNs, no need for conversions) to a more detailed [WebRobots](#) Dataset.

Pros:

- **Golden** details such as URL, creators information, photos, blurb, kickstarter info (staff pick, spotlight and more).

Cons:

- Heavy, need to combine more than 200 CSVs
- CSVs are **not uniform**, lots of NaNs and different columns
- Hard **Conversion** Working: JSON extraction, time and currency conversions and more
- Refactor our code!!!
- Different distribution – different model results

Our DataSet .

Over 250 projcets (entries)

ID internal kickstarter ID | Creator creator id

Name name of project | Blurb of the project

Category main and sub category | state current condition the project is

Initial, launched and deadline times | URL and Photos

Goal fundraising goal | Pledged amount pledged by "crowd" | Backers number of backers

Locationcountry and city of the project | Currency currency

Our DataSet .

KICKSTARTER

Rewards

"Like it or not, almost no one does something for nothing."

Kickstarter lets the creator to create a series of rewards to say "thank you" to their backers.

It may give us a feature that will greatly affect success or failure of the project.

Pledge US\$ 10 or more

A digital copy of "A Day in The Life." We will notify you when your copy is ready via email.

ESTIMATED DELIVERY
Jun 2015

10 backers

Pledge US\$ 25 or more

A digital and physical copy of "A Day in The Life." The physical copy will include pictures from the recording and notes written by our students. We will notify you when your copy is ready via email.
